EDUCATION

VIT Bhopal University

B.Tech in Computer Science and Engineering — CGPA: 8.68/10

Bhopal, India

2022 – May 2026

TECHNICAL SKILLS

- **Languages:** Java, Python, C++, C#, C, JavaScript, SQL
- **Web Development:** HTML5, CSS3, Bootstrap, RESTful APIs, Tailwind CSS
- **Full Stack:** MERN (MongoDB, Express.js, React.js, Node.js)
- **Machine Learning:** Scikit-learn, TensorFlow, Keras, NLP, OpenCV
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Tools & Platforms:** Git, GitHub, Postman, VS Code, Figma, Firebase Auth, JWT, AWS (EC2, S3), Vercel, Render
- **Practices:** Agile, GitFlow, CI/CD (Render, GitHub Actions), Unit Testing (PyTest, Jest)

EXPERIENCE

Honeywell

Software Development Engineer Intern

Jan 2026 – Present

Full Stack Development

- Built scalable full-stack apps using **ASP.NET (.NET)** and **React**.
- Enabled real-time updates using **SignalR (WebSockets)**.
- Developed AI log analysis POC with **Python** and **OpenAI LLMs**, reducing issue detection time by **30%**.
- Optimized batch pipelines and improved performance in Agile workflows.

PROJECTS

MediTalk — AI Health Assistant

Tech Stack: FastAPI, React (TS), HuggingFace, Tesseract OCR, gTTS

- Engineered a multilingual AI assistant using OCR + NLP, improving medical-document clarity and support efficiency for **100+ users**.
- Integrated a **BART** summarizer that increased user comprehension by **30%** and reduced reading load.
- Enabled voice-based interaction in **5+ languages**, cutting onboarding and navigation friction by **40%**.
- Designed a Q&A module trained on **1k+ queries**, lowering patient lookup time and boosting response accuracy.

CodeSage — AI Static Code Reviewer

Tech Stack: Python (FastAPI), React + Tailwind, AST, pylint, flake8, bandit, radon, Random Forest, MongoDB

- Architected a modular static-analysis pipeline that increased code-quality coverage by automating syntax, style, and security checks.
- Applied AST-driven analysis to detect dead code, unused imports, and inefficiencies, reducing debugging time across projects.
- Consolidated pylint/flake8/bandit + radon insights into actionable PDF/JSON reports, improving issue triage for developers.
- Introduced a Random-Forest rule engine with history tracking to surface recurring coding issues and raise long-term code reliability.

Doctor's Aid — Hospital Automation System

Tech Stack: Django, React.js, MySQL, REST API, Scikit-learn

- Managed **500+** patient profiles via RBAC-secured dashboards, improving data governance and workflow consistency.
- Streamlined scheduling logic, reducing patient wait times by **35%** and increasing operational throughput.
- Delivered real-time monitoring dashboards that improved administrative responsiveness by **22%**.
- Integrated ML models (Diabetes: **77.27%**, Heart Disease: **90%+**) to support faster and more accurate clinical decisions.

CERTIFICATIONS

- Machine Learning Specialization — Stanford (Coursera)
- SmartBridge - Full Stack Development

ACHIEVEMENTS

- Built **12+ open-source projects** — AgroSphereX, MediTalk, Flight Finder, Mausam.
- Solved **400+ LeetCode problems** — Rating: **1434**, Top **70.06%** globally.
